Athanasios Velios is Reader in Documentation at the University of the Arts London working on conservation documentation. He trained as a conservator in Greece (Technological Educational Institute of Athens) and completed his PhD in London (Royal College of Arts, 2002) on computer applications to conservation. He worked on the St. Catherine's condition survey project designing the project databases and documentation forms. He developed the framework for the Language of Bindings Thesaurus. He was the webmaster for the International Institute for Conservation (2008-2017) where he redeveloped the Institute's website. He established the Documentation Network of the Institute of Conservation in the UK. He worked as Data Architect for the Oxford Linked Open Data pilot (OXLOD, 2018). He has been contributing to the CIDOC-CRM SIG since 2014 and he is a member of the Linked Art editorial board. He currently leads the Linked Conservation Data project: an AHRC-funded project to enable integration of conservation records.
